Summary Statement

- Inquisitive and coachable team member with the ability to work in a fast-paced and ever-changing environment
- Love for dynamic and flowing design that integrates seamlessly with back end applications
- Natural ability to quickly take on a new skill and become a go-to expert
- Currently working on becoming an expert in CSS, Python and AWS

Skills

HTML5 | CSS | MERN Stack | jQuery | Java | Spring Boot | JavaScript | Bootstrap | Python | Materialize | GitHub | Firebase | mySQL | Redux | Vue | REST | APIs | Photoshop

---

App & Website Development

Cicerone Beer Quiz
- Created a game from scratch using HTML, CSS, JS, jQuery and a combination of Bootstrap & Materialize

Curious: A Curiosity Rover Photo App
- Created a full stack MERN application that implemented the NASA Curiosity Rover API
- This application was styled with Bootstrap

Eat Drink Den
- Created a full stack application that utilized the MERN stack and a Bootstrap template
- As a team of two, I set up the backend controllers and models in Node.js with Express
- When we became a team of three, I moved to the front end and dropped the React code into a Bootstrap template.

No Scalpers Application
- Took existing front end in React and replaced existing Node.js/Express backend with Java 8 using IntelliJ and Maven

The OCD Foundation
- Overhauled non-profit website for a more cohesive design using HTML and CSS

Snorkeling Quest
- Created a website for Snorkeling Quest using HTML, jQuery and a Bootstrap template

Travel Application
- Created a full stack application that allows users to keep track of their upcoming travel arrangements with React, Redux, Firebase and Materialize. Firestore holds the database
